

LIPID SHIELD SPF 30

Why Epicutis® Lipid Shield Delivers Superior Value

While standard medical-grade SPF's offer UV protection, **Epicutis® Lipid Shield SPF 30** represents a fundamental shift from reactive sun care to **proactive** sun care. This isn't just sunscreen—it's a scientifically-advanced system that delivers benefits beyond sun protection.

WHAT SETS LIPID SHIELD APART: PROPRIETARY INNOVATION

-  **Exclusive Active Ingredient:** TSC (Disodium Tetramethylhexadecenyl Succinoyl Cysteine) is a proprietary biotechnology breakthrough developed at Princeton University
-  **Multi-Modal Action:** While other SPF's simply block UV rays, TSC actively reduces inflammation, combats fine lines and wrinkles, and protects against collagen breakdown by blocking UV-induced MMP-1 production, preserving both elastin and collagen integrity
-  **Clinical Validation:** Proven to improve skin texture and smoothness while providing protection—functionality you won't find in any other sunscreen

BEYOND UV PROTECTION: ACTIVE SKIN RESTORATION

Most medical-grade SPF's are single-purpose products. Epicutis® Lipid Shield functions as:

- Daily UV Shield with 21% non-nano zinc oxide
- Skin Structure Support through collagenase inhibition
- Anti-Inflammatory Therapy reducing redness and irritation
- Skin Barrier Support System with botanical actives

CLEAN, SCIENCE-BACKED INGREDIENTS

- 100% Non-toxic
- Pharmaceutical-Grade Botanicals:
 - Dipotassium Glycyrrhizinate from licorice root for inflammation control
 - Medical-grade Aloe Vera (inner leaf fillet only) for hydration and recovery
 - Bisabolol from chamomile for barrier repair

After aesthetic treatments, skin is temporarily more sensitive and prone to pigmentation and inflammation.

Epicutis® Lipid Shield SPF 30 provides critical broad-spectrum defense to protect results and support a smooth, even recovery.
