

# LIPID SHIELD

## SPF 30

Built by biotech, it protects skin from UVA/UVB rays, stays put through sweat and activity, and helps calm and hydrate sun-stressed skin — all without clogging pores or causing irritation.

### PROTECT + REPAIR WITH:

#### Non-nano Zinc Oxide (21%)

Non-nano mineral zinc oxide that provides broad-spectrum SPF 30 protection by sitting on the skin's surface rather than being absorbed. Ideal for sensitive skin and daily use, it's free from chemical filters and nanoparticles, and is non-toxic.

#### TSC (Disodium Tetramethylhexadecenyl Succinoyl Cysteine)

A patented anti-inflammatory compound that helps reduce UV-induced redness, improve skin texture, reduce blemishes, and protect against collagen breakdown by inhibiting collagenase production. Clinically proven to reduce fine lines and wrinkles.
